SUMMARY

- **Programming Languages:** Strong foundation in Java (OOP) and C++, with practical experience using Python for backend automation and AI solutions, and JavaScript/TypeScript for frontend development.
- **Full-Stack Development:** Experienced in building applications using React, HTML and CSS for frontend development, with Spring Boot, RESTful APIs and database connectivity for backend development.
- **Software Engineering:** Experienced in requirements analysis, application development, testing, debugging and software improvement through internships and university projects.
- **AI-Assisted Development:** Used Python and Microsoft Copilot to develop AI-enabled solutions, review outputs and improve workflows with appropriate human validation.
- **Databases:** Proficient in MySQL, MSSQL and SQL, including database design, query development and maintaining data integrity.
- **Agile and Development Tools:** Experienced in Agile Scrum, GitHub, Visual Studio, IntelliJ IDEA and collaborative software development.
- **Security and Reliability:** Familiar with secure system design, SHA-256 hashing, secure logging, cryptography and network fundamentals.
- **Professional Collaboration:** Experienced in gathering requirements from business and technical specialists, translating business needs into software solutions and communicating technical outcomes clearly.

EDUCATION

Sept 2023 – Present	BSc (Hons) Computer Science (AI)	Brunel University London
• Logic and computation • Information Systems and Organizations • Data and Information • Artificial Intelligence • Software Engineering	• Algorithms and their Applications • Networks and Operating Systems • Usability Engineering • Software Development and Management • Cyber Security	
July 2022	Access to HE Diploma IT (<i>Distinction</i>)	Newham College London
July 2017	GCSEs including Mathematics and English	Bangladesh Bank High School

WORK EXPERIENCE

July 2026 – August 2026	AI Tax Technology Transformation Intern	EY Canary Wharf London
• Developed a Python-based AI review agent to automate the first-pass review of iXBRL statutory accounts and identify missing, inconsistent and potentially incorrect tags. • Built automated Python workflows to extract and transform iXBRL data, compare current and prior-year filings, and generate evidence and exception reports, reducing reliance on manual review steps. • Contributed to filing analysis, tagging validation, comparison and technical checks, using human oversight to validate and refine AI-generated outputs. • Gathered requirements from Corporate Tax SMEs and iXBRL specialists and translated complex review processes into practical software capabilities. • Tested and improved the solution using stakeholder feedback and communicated progress through demonstrations and technical documentation. • Used Microsoft Copilot to support code development, technical analysis and documentation, reviewing generated outputs for accuracy, relevance and quality.		
June 2025 – July 2025	Edge AI Engineering Intern ArbaLabs	(ArbaEdge Programme) – Remote
• Contributed to ArbaEdge, a system designed to verify the authenticity of AI models and outputs from drones and satellites. • Built Python backend prototypes to generate and log SHA-256 hashes, simulate validation workflows and support future device integration. • Applied SHA-256 hashing, secure logging and offline trust mechanisms to validate image and AI model files. • Participated in Agile check-ins and collaborated with ArbaLabs and Pagoda Projects mentors.		

TECHNICAL PROJECT WORK

Oct 2025 – March 2026	AeroAlert(FYP): AI-Driven Weather & Respiratory Health Risk Prediction	Brunel University London
• Developed an AI-driven application to predict respiratory health risks using weather and air-quality data, including AQI, humidity, temperature and pollution levels. • Prepared and analysed data and applied classification and regression models in Python and R to generate personalised risk predictions. • Evaluated model performance and presented trends and AI-generated insights through a React and TypeScript dashboard. • Built structured user-input and visualisation features while considering usability, reliability and maintainable code.		

Oct 2024 – April 2025	Website Development	Brunel University London
- Developed a full-stack application using React, JavaScript, Spring Boot, RESTful APIs and MySQL. - Integrated frontend, backend, API and database components to deliver reliable application functionality. - Used GitHub and Agile Scrum to collaborate on coding, testing, debugging and troubleshooting, iterating on features during sprint delivery. - Tested and improved application features to support usability, reliability and maintainable code.		
Nov 2023 – March 2024	Raspberry Pi Swiftbot	Brunel University London
- Designed and implemented a Java-based navigation system using object-oriented programming and pathfinding algorithms. - Debugged and improved navigation logic to support efficient traversal and accurate movement. - Collaborated with team members to integrate the navigation component with the wider Swiftbot system.		
Oct 2023 – Nov 2023	Formative Task (Simon Game)	Brunel University London
- Worked as part of an 8-person team to develop and implement the Simon Game project using the Raspberry Pi Swiftbot platform. - Led the implementation of the game using command-line interface techniques, algorithm design, flowcharts, and pseudocode. - Demonstrated problem-solving, teamwork, time management, and project management skills to support successful and timely project completion.		

PROFESSIONAL DEVELOPMENT

Feb 2026	Impact Challenge 2025-26	Brunel University London
Worked as part of a student consultancy team with Hillingdon Council to develop low-cost, practical solutions for improving Hayes Town Centre, strengthening my leadership, teamwork, and problem-solving skills.		
Oct 2025	R for Data Science: Analysis and Visualization	LinkedIn Learning
Gained hands-on experience in R programming for data visualization, data wrangling, and statistical analysis (correlation, regression, and descriptive analytics).		
Dec 2024	READY Programme	Brunel University London
- Collaborated in a team of 5 to design a product solution for refugees in Mayukwayukwa, contributing to idea development and project delivery. - Developed key skills including teamwork, public speaking, networking, and goal setting through active participation in workshops and team projects.		

INTERESTS

- Actively engage in technology communities through meetups, hackathons, and conferences, with a strong interest in AI, software development, and digital transformation.
- Participated in EY Tax Technology & Transformation Strategy Day and professional networking activities, gaining exposure to business strategy, innovation, collaboration, and the wider corporate environment.
- Attended industry insight and networking events hosted by organisations including IBM, Bright Network, and STEM initiatives, expanding my understanding of technology careers and industry trends.
- Enjoy team sports including badminton, throwball, and handball, alongside volunteering at university and community events, strengthening teamwork, adaptability, and communication skills.

ACHIEVEMENTS

- Earned the prestigious **Brunel+ Silver Award** in recognition of my contribution to **campus life, personal development, and community engagement**.

CERTIFICATIONS AND TECHNICAL TRAINING

Information Security for New Joiners — EY, July 2026

Data Protection Fundamentals — EY, July 2026

Financial Crime Training: Anti-Money Laundering — EY, July 2026

React Essential Training — LinkedIn Learning, January 2026
